

AFE

AFE BAG FILTER

Suitable for non-hazardous fluid

Amafilter® offer a wide range of bag filter housings. The AFE bag filters are suitable for a wide variety of filtration applications. The AFE bag filter housings are ideal for use in the edible oil safety filtration process at the end of crude oil or bleaching steps. The AFE bag filter range is suitable for size 1 and size 2 filter bags, it is easy to use and cost effective. It is available in carbon steel or stainless steel.

The Amafilter® AFE bag filter range is ideal for the filtration of liquids containing higher concentrations of coarse solids. It is particularly effective for handling batches of (various) liquids and for end filtration or polishing of liquids with extremely low concentrations of solids.

FEATURES

- Easy to operate and to access.
- Effective interior sealing.
- The cover closure has hinged eye bolts and eye nuts in galvanised steel. Stainless steel bolts and nuts are optional.
- Flat cover with handle.
- O-ring sealing: standard Buna N. Other materials available on demand.
- Durable stainless steel metal mesh support basket for low flow resistance and maximum utilisation of entire surface area.
- Slightly conical support basket for easy filter bag removal.
- Liquid displacement cover: leak proof for complete seal when opening the filter.
- Liquid displacer units are available to further reduce the dead volume inside the filter bags.
- Perfect sealing between unfiltered liquid and filtered liquid is achieved by a spring-loaded hold-down device onto the filter bag and support basket. The filter bag seals with a feltcovered snap-collar ring or plastic seal which tightly fits into the support basket.
- Height-adjustable legs.
- The maximum temperature for these housings is 90 °C.
- Height adjustable legs.
- Liquid displacement cover design: no liquid runs over the side when opening the filter. Safe and clean operation.

STANDARD SPECIFICATIONS

Design pressure:	0 / 10 bar(g)
Design temperature:	-10 / 120°C
Operating temperature:	Depending on the filter media and gaskets used
PED 2014/68/EU:	Article 4 paragraph 3

MAXIMUM DIFFERENTIAL PRESSURE

Design:	4.0 bar
Operating:	2.5 bar

FILTER BAGS

Amafilter® supplies a wide range of filter bags in different materials, pore sizes, dimensions and models to fit in our range of bag filter housings as well as those of other manufacturers.

OPTIONS

Strainer baskets

The filter housings can be equipped with stainless steel filter baskets in several mesh sizes. The filter housings can then be used as strainers.

Special models to suit customer requirements

Other options of supply and manufacture are non-standard types for higher temperatures, pressures and other materials according to current design codes, available on request.

DIMENSIONS

Nozzle specification

N1 : Inlet

N2 : Outlet

N3 : Vent (Rp ¼ - ISO7-1)

DIMENSIONAL INFORMATION

SIZE	DIAMETER A	STANDOUT B	HEIGHT C	NOZZEL HEIGHT D	VOLUME	WEIGHT
mm	mm	mm	mm	mm	dm ³	kg
